

FC Tech is pleased to expand its portfolio of Chlor-Alkali offerings with the addition of Durco plug valves for chlorine & caustic services.

Partnering with your local or preferred Flowserve representative, FC Tech has available inventory and a supporting sales team with decades of experience to help solve your toughest problems specific to Chlorine Gas, Liquid Chlorine, & Phosgene applications.

Durco offers a wide range of plug valve models, materials, & configurations – providing flexibility to meet your unique application needs.

FC Tech will have inventories readily available in the following configurations:

- Durco G4B (Marathon Stem Seal) Model Plug Valve
- Available material selections include Carbon Steel (WCB & LCB), Hastelloy C 276, Nickel, & Alloy 20 – based on your service application
- Available in Threaded and Raised Face Flanged End Configurations
- Available in ASME 150 lbs and 300 lbs
- Sizes in ½” thru 12”

Please call us today to learn more about this exciting addition!
